

PD-3: Comments on events (delivery report)

Status: delivered · Revision 2 · Created by Ivan Blažević <ivan.blazevic@rubycode.co> · 30 September 2026

Summary

6 of 6 tickets merged. 42 of 42 acceptance criteria are proven by a passing scenario.

Tickets and pull requests

#	Ticket	Status	Pull request	Merge commit	Approved by
T1	Migration: Create comments table	merged	#40	28dc943	Ivan Blažević <ivan.blazevic@rubycode.co>
T2	Add Comment model and delete comments with their event or author	merged	#41	d6808f0	Ivan Blažević <ivan.blazevic@rubycode.co>
T3	Show comments on the event page	merged	#42	e5ea511	Ivan Blažević <ivan.blazevic@rubycode.co>
T4	Post a comment on an event	merged	#43	5aa1c48	Ivan Blažević <ivan.blazevic@rubycode.co>
T5	Let authors delete their own comments	merged	#44	9284d3e	Ivan Blažević <ivan.blazevic@rubycode.co>
T6	Let organizers delete any comment on their event	merged	#45	efe49c9	Ivan Blažević <ivan.blazevic@rubycode.co>

Acceptance criteria and proof

Cucumber, run 30 Sep 2026 15:01 on commit efe49c9 : bundle exec cucumber --tags "@pd-3-t1 or @pd-3-t2 or @pd-3-t3 or @pd-3-t4 or @pd-3-t5 or @pd-3-t6"

AC	Criterion	Scenario	Result
T1.1	Migrating creates the comments table with NOT NULL columns event_id, user_id, body, created_at and updated_at, and body has no default	Migrating creates the comments table (features/pd-3-comments-on-events/t1.feature:11)	passed

AC	Criterion	Scenario	Result
T1.2	Inserting a comments row for an event or user that does not exist fails with ActiveRecord::InvalidForeignKey	Rows must point at an existing event and person (features/pd-3-comments-on-events/t1.feature:17)	passed
T1.3	Inserting a comments row with an empty or space-only body fails the check constraint comments_body_length_check	The body must not be empty or only spaces (features/pd-3-comments-on-events/t1.feature:24)	passed
T1.4	Inserting a comments row with a 1,001-character body fails the check constraint comments_body_length_check, and a 1,000-character body containing accented letters and emoji is accepted	The body is at most 1,000 characters (features/pd-3-comments-on-events/t1.feature:31)	passed
T1.5	The index index_comments_on_event_id_and_created_at is on event_id, created_at, the index index_comments_on_user_id is on user_id, and there is no index on event_id alone	Event page and per-person lookups are indexed (features/pd-3-comments-on-events/t1.feature:39)	passed
T1.6	Neither comments foreign key cascades on delete: deleting an event or user that has a comments row directly in the database fails with ActiveRecord::InvalidForeignKey	Deleting an event or person does not cascade to comments (features/pd-3-comments-on-events/t1.feature:45)	passed
T1.7	Rolling back the comments migration drops the comments table and leaves the events, users, rsvps and sessions tables unchanged	Rolling back drops only the comments table (features/pd-3-comments-on-events/t1.feature:55)	passed
T2.1	A comment with an event, an author and a body is valid	A comment with an event, an author and a body is valid (features/pd-3-comments-on-events/t2.feature:11)	passed
T2.2	A comment whose body is blank or only whitespace, including newlines and tabs, is invalid, because the body is stripped before validation	A blank or whitespace-only body is invalid (features/pd-3-comments-on-events/t2.feature:22); A blank or whitespace-only body is invalid (features/pd-3-comments-on-events/t2.feature:23); A blank or whitespace-only body is invalid (features/pd-3-comments-on-events/t2.feature:24); The body is stripped before validation (features/pd-3-comments-on-events/t2.feature:27)	passed

AC	Criterion	Scenario	Result
T2.3	A comment of exactly 1,000 characters is valid, and one of 1,001 characters is invalid with the error 'Body is too long (maximum is 1000 characters)'	The body is at most 1,000 characters (features/pd-3-comments-on-events/t2.feature:33)	passed
T2.4	Comments on an event are listed oldest first, and two comments with the same created_at are listed in id order	Comments are listed oldest first, then in id order (features/pd-3-comments-on-events/t2.feature:40)	passed
T2.5	Destroying an event deletes its comments	Destroying an event deletes its comments (features/pd-3-comments-on-events/t2.feature:52)	passed
T2.6	Destroying a user deletes the comments they wrote on other people's events	Destroying a user deletes the comments they wrote on other people's events (features/pd-3-comments-on-events/t2.feature:62)	passed
T2.7	Destroying a user who organizes an event that has other people's comments succeeds without a foreign key error, and those comments are gone	Destroying an organizer whose event has other people's comments succeeds (features/pd-3-comments-on-events/t2.feature:70)	passed
T3.1	A signed-out visitor opening an event with comments sees the heading 'Comments (2)' and each comment's author name, posted time and body	A signed-out visitor sees each comment's author, posted time and body (features/pd-3-comments-on-events/t3.feature:10)	passed
T3.2	Comments are listed oldest first	Comments are listed oldest first (features/pd-3-comments-on-events/t3.feature:24)	passed
T3.3	An event with no comments shows 'Comments (0)' and 'No comments yet. Ask a question.'	An event with no comments invites a question (features/pd-3-comments-on-events/t3.feature:38)	passed
T3.4	The posted time is shown as '30 September 2026 · 15:19' inside a time element whose datetime attribute is the ISO 8601 timestamp	The posted time is shown in a time element with an ISO 8601 datetime (features/pd-3-comments-on-events/t3.feature:44)	passed
T3.5	A comment whose author has a blank name, set with update_column, shows the author as 'Someone'	An author with a blank name shows as Someone (features/pd-3-comments-on-events/t3.feature:50)	passed

AC	Criterion	Scenario	Result
T3.6	A comment body containing <code><script>alert(1)</script></code> and <code>x</code> is shown as literal escaped text, and no script or link element is rendered	HTML in a comment is shown as literal text (features/pd-3-comments-on-events/t3.feature:59)	passed
T3.7	A comment body with line breaks is shown as separate lines or paragraphs	Line breaks in a comment are kept (features/pd-3-comments-on-events/t3.feature:72)	passed
T3.8	The page makes 1 query against comments, and the number of queries against users is the same for 1 comment as for 10 comments by different authors	The event page loads comments and authors in a fixed number of queries (features/pd-3-comments-on-events/t3.feature:86)	passed
T4.1	A signed-in user who submits 'Is there parking nearby?' is taken back to the event's comments section and sees 'Comment posted.' and the comment with their name	A signed-in person posts a question (features/pd-3-comments-on-events/t4.feature:10)	passed
T4.2	A signed-in user sees the comment form, and the textarea is required and has maxlength 1000	A signed-in person sees a required, length-limited comment box (features/pd-3-comments-on-events/t4.feature:21)	passed
T4.3	A signed-out visitor sees a 'Sign in to comment' link and no comment form, and following the link opens the sign-in page	A signed-out visitor is invited to sign in instead (features/pd-3-comments-on-events/t4.feature:28)	passed
T4.4	A signed-out POST to the event's comments is redirected to the sign-in page, and no comment is created	A signed-out visitor cannot post by sending the request directly (features/pd-3-comments-on-events/t4.feature:37)	passed
T4.5	Posting a blank or whitespace-only body creates no comment and shows the alert "Body can't be blank"	A blank body is rejected (features/pd-3-comments-on-events/t4.feature:54); A blank body is rejected (features/pd-3-comments-on-events/t4.feature:55); A blank body is rejected (features/pd-3-comments-on-events/t4.feature:56)	passed
T4.6	Posting a 1,001-character body creates no comment and shows the alert 'Body is too long (maximum is 1000 characters)'	A body over 1,000 characters is rejected (features/pd-3-comments-on-events/t4.feature:59)	passed

AC	Criterion	Scenario	Result
T4.7	Posting with extra user_id, event_id and created_at params creates a comment owned by the signed-in user on the event from the URL, with its own timestamp	Extra user_id, event_id and created_at params are ignored (features/pd-3-comments-on-events/t4.feature:67)	passed
T4.8	Posting to an event that does not exist returns 404	Posting to an unknown event returns 404 (features/pd-3-comments-on-events/t4.feature:74)	passed
T5.1	An author clicks Delete on their own comment, confirms 'Delete this comment?', sees 'Comment deleted.', and the comment is gone	An author deletes their own comment after confirming (features/pd-3-comments-on-events/t5.feature:11)	passed
T5.2	A signed-in user sees no Delete button on comments written by other people	A signed-in person sees no Delete button on other people's comments (features/pd-3-comments-on-events/t5.feature:21)	passed
T5.3	A signed-in user who is neither author nor organizer and sends DELETE for someone else's comment gets 'You can't delete this comment.', and the comment remains	Someone who is neither author nor organizer cannot delete by sending the request directly (features/pd-3-comments-on-events/t5.feature:28)	passed
T5.4	A signed-out DELETE is redirected to the sign-in page, and the comment remains	A signed-out DELETE is sent to sign-in (features/pd-3-comments-on-events/t5.feature:35)	passed
T5.5	Sending DELETE for a comment id through a different event's URL returns 404, and the comment remains	A comment id sent through another event's URL returns 404 (features/pd-3-comments-on-events/t5.feature:42)	passed
T5.6	Deleting a comment writes the log line 'Comment deleted: comment_id=<id> event_id=<event_id> author_id=<author_id> deleted_by=<current user id>'	Deleting a comment is logged (features/pd-3-comments-on-events/t5.feature:50)	passed
T5.7	Showing Delete buttons adds no queries against events: the page still makes 1 query against comments, and the number of queries against events is the same for 1 comment as for 10	Showing Delete buttons adds no queries against events (features/pd-3-comments-on-events/t5.feature:57)	passed
T6.1	An organizer clicks Delete on another person's comment on their event, confirms, sees 'Comment deleted.', and the comment is gone	An organizer deletes another person's comment after confirming (features/pd-3-comments-on-events/t6.feature:11)	passed

AC	Criterion	Scenario	Result
T6.2	An organizer sees a Delete button on every comment on their event	An organizer sees a Delete button on every comment on their event (features/pd-3-comments-on-events/t6.feature:21)	passed
T6.3	The organizer of a different event sees no Delete button on comments by others, and sending DELETE gets 'You can't delete this comment.' while the comment remains	The organizer of a different event cannot delete comments by others (features/pd-3-comments-on-events/t6.feature:29)	passed
T6.4	An organizer deleting someone else's comment writes a log line where deleted_by is the organizer's id and author_id is the comment author's id	An organizer deleting someone else's comment is logged (features/pd-3-comments-on-events/t6.feature:40)	passed
T6.5	Viewed by the organizer, an event with 10 comments makes 1 query against comments, and the number of queries against events and users is the same as with 1 comment	Showing the organizer Delete buttons adds no queries per comment (features/pd-3-comments-on-events/t6.feature:47)	passed

Checks run on each pull request

- **T1**: all checks passed
- **T2**: all checks passed
- **T3**: all checks passed
- **T4**: all checks passed
- **T5**: all checks passed
- **T6**: all checks passed

Tokens and cost

Step	Ticket	Model	Input	Output	Cache	Time	Cost
plan drafted	-	claude-opus-5-5	109,186	28,978	0	-	-
database_changes redrafted	-	claude-opus-5-5	37,218	2,503	0	-	-
tickets drafted	-	claude-opus-5-5	81,453	8,474	0	-	-
agent run	T1	claude-opus-5-5	50	12,652	1.12M	5.0 min	-
agent run	T2	claude-opus-5-5	46	12,437	1.17M	4.3 min	-

Step	Ticket	Model	Input	Output	Cache	Time	Cost
agent run	T3	claude-opus-5-5	46	12,904	1.09M	4.4 min	-
agent follow-up	T3	claude-opus-5-5	14	3,566	378,444	1.3 min	-
agent run	T4	claude-opus-5-5	46	13,419	1.23M	4.5 min	-
agent run	T5	claude-opus-5-5	56	13,438	1.48M	5.0 min	-
agent run	T6	claude-opus-5-5	36	7,440	805,096	3.2 min	-

Total: 7.62M tokens. No price is set for claude-opus-5-5; add it to `config.token_prices` to see dollars.

Approvals

When	Subject	Role	Decision	By	Note
30 Sep 2026 13:25	plan r2	review	approved	Ivan Blažević <ivan.blazevic@rubycode.co>	
30 Sep 2026 13:28	plan r2	tickets:review	approved	Ivan Blažević <ivan.blazevic@rubycode.co>	
30 Sep 2026 13:44	T1 pull request	pr	approved	Ivan Blažević <ivan.blazevic@rubycode.co>	
30 Sep 2026 13:55	T2 pull request	pr	approved	Ivan Blažević <ivan.blazevic@rubycode.co>	Read the model, the cascades and the specs. Matches the plan.
30 Sep 2026 14:07	T3 pull request	pr	rejected	Ivan Blažević <ivan.blazevic@rubycode.co>	Placement, outstanding question 1: comments go in the main column, directly below the About this event card, not in the sidebar. Keep the specs and scenarios passing.

When	Subject	Role	Decision	By	Note
30 Sep 2026 14:17	T3 pull request	pr	approved	Ivan Blažević <ivan.blazevic@rubycode.co>	Comments now sit in the main column below About this event, as decided. Read the partials and the specs.
30 Sep 2026 14:28	T4 pull request	pr	approved	Ivan Blažević <ivan.blazevic@rubycode.co>	Read the controller, the form and the specs. Author and event come from the session and the URL.
30 Sep 2026 14:39	T5 pull request	pr	approved	Ivan Blažević <ivan.blazevic@rubycode.co>	Only the author gets the Delete button and the destroy action checks it again. Read the specs.
30 Sep 2026 14:48	T6 pull request	pr	approved	Ivan Blažević <ivan.blazevic@rubycode.co>	One rule in deletable_by?, no extra queries on the page. Read the specs.
